DATA SHEET ConferenceManager 9.3

Sonexis ConferenceManager is an in-house audio conferencing bridge that eliminates the costly pay-as-you-go fees of subscription-based services, while setting new standards for security and ease of use. Designed to work within existing voice and data networks — and available with a fully integrated Web conferencing option — ConferenceManager has been deployed by hundreds of leading organizations with minimal cost, effort, or administration. In fact, Sonexis has delivered more audio conferencing bridges than any other vendor serving the small and medium-sized enterprise.

DISCOVER THE BENEFITS:

An Irresistible Economic Story The financial picture is clear. Sonexis ConferenceManager provides a rapid, compelling payback. Your service provider just can't compete. A minimal one-time investment and your organization begins saving immediately regardless of how your conferencing usage scales. Watch your savings—not your costs—skyrocket.

Better still, you pay only for what you need. With our unique architecture you're never more than a license key away from increasing users, adding Web functionality, or changing from one protocol to another. Simply put, it's the best thing to happen to conferencing.

Unprecedented Ease of Use and Administration The ability to adapt ConferenceManager to your changing needs through a simple software upgrade is just the beginning of ConferenceManager's unmatched ease of use. Whether you're an end-user or the system administrator, you'll be surprised that conferencing can be so easy. Simply plug ConferenceManager into your voice (PSTN) or data network (VoIP) and within minutes your organization
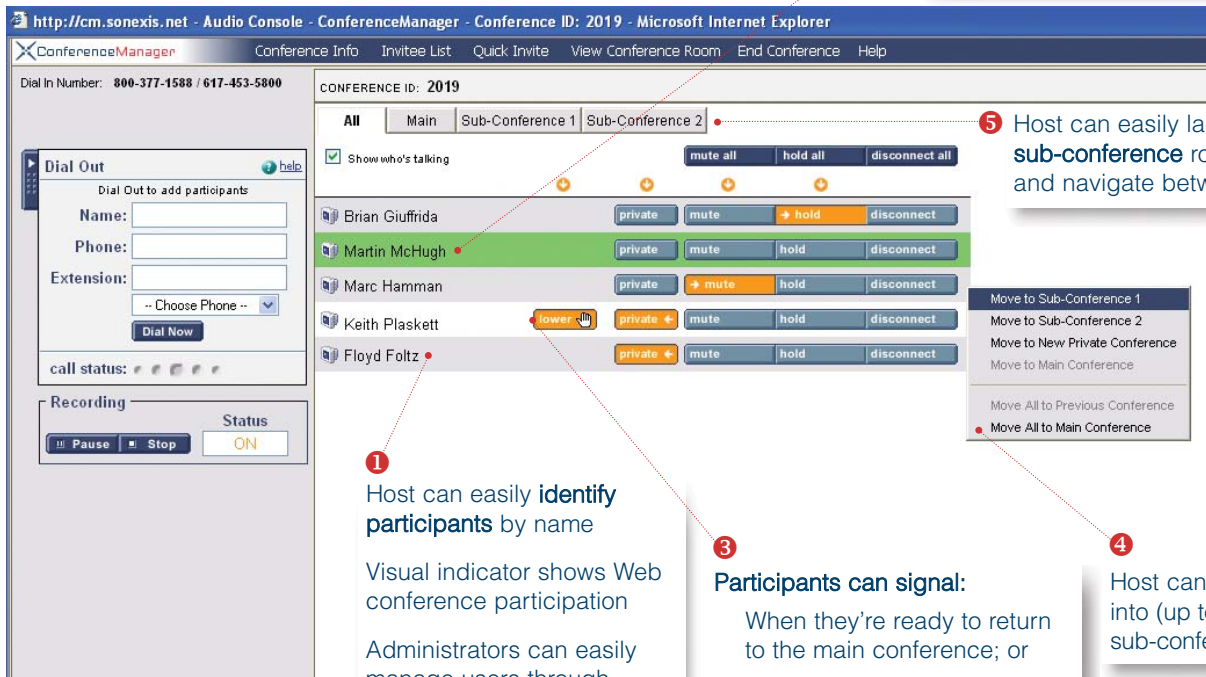

will be scheduling, launching, and recording conferences; collaborating over files in real-time; even inviting new conference attendees on the fly.

ConferenceManager makes it very easy for everyone. Familiar applications (like Microsoft Outlook, Lotus Notes, and the Web browser) provide the interfaces that make ConferenceManager accommodating for your end-user; while simple Web-based administration provides the flexibility you need to meet your organization's needs.

Sensible Protection for Your Business-Critical Information ConferenceManager is an outstanding audio conferencing bridge with integrated Web conferencing that sits on your network under your management. ConferenceManager's smart, embedded security features keep your information safe from outside intrusion. You maintain control of critical business information and the security procedures that protect it.

ConferenceManager's powerful features give you fast, full-function audio conferencing that is cost-effective, easy to use, and secure.

❷ ActiveTalker™ highlights who's speaking— or who's got the noisy line

❺ Host can easily label **sub-conference** rooms and navigate between them

❶ Host can easily **identify participants** by name

Visual indicator shows Web conference participation

Administrators can easily manage users through

❸ Participants can signal:

When they're ready to return to the main conference; or

When they have a question in listen-only "lecture" mode

❹ Host can **divide participants** into (up to) ten private sub-conferences
