

Network Fax Servers

FaxPress™, FaxPress Premier™, FaxPress Enterprise™

A New Generation of Network Fax Servers That Offer Instant ROI, From Small Offices and Workgroups to Enterprise-level Applications

CASTELLE®

Any organization still relying on a stand-alone fax machine is all too familiar with the frustrations of manual faxing: the failed transmission attempts, the line busy signals, the time spent waiting for faxes to send. . . and resend.

Add to that the time spent waiting by the fax machine for the arrival of important or confidential faxes, the time spent troubleshooting paper jams, the time spent apologizing to customers for misplaced faxes, and the labor-intensive, error-filled manual faxing process soon reveals itself to be more than just an inconvenience. Compromised customer service, inefficiency, lost productivity -- manual faxing ultimately amounts to a huge waste of time, money, and resources.

Castelle Network Fax Servers -- The Network Faxing Alternative

Castelle's fax server family, FaxPress, FaxPress Premier and FaxPress Enterprise, offers your organization every possible computer-based, network fax option: desktop PC faxing, production faxing, fax and email integration, workflow application integration, as well as tools for developing custom fax applications.

Save Time, Save Money

Whether you choose a fax server from Castelle's FaxPress, FaxPress Premier or FaxPress Enterprise product line, you can expect reduced communication costs, accelerated processing time, and more streamlined, higher quality communication. Offering straightforward integration with virtually all computing applications, messaging environments and telephony interfaces, Castelle fax servers provide network fax solutions tailored to meet the needs of any organization, whether it's a small business or a large enterprise with thousands of users.

An Integrated Fax Solution

A market leader in network fax solutions, Castelle provides an economical way for companies to integrate fax into desktop, email and back-end applications. No more walking to the fax machine or waiting around for confidential

faxes. The plug-&-forget nature of Castelle products means Castelle fax servers come with all the necessary hardware and software and do not require per user licenses. That's why network administrators find FaxPress an easy-to-install and easy-to-manage server appliance that saves your company time and money.

Expandable Product Line

Designed as a departmental or workgroup fax server, FaxPress offers a scalable fax solution ranging from an entry-level, single-line unit to a high-end, eight-line unit. FaxPress Premier and FaxPress Enterprise are designed for enterprise-level applications. FaxPress Premier offers four to sixteen analog fax lines; FaxPress Enterprise offers up to three digital T-1 lines per fax server. And since Castelle fax servers can work together on the same network, additional units can be added to the network at any time to handle increased fax demand.

FaxPress for Business Faxing

FaxPress network fax servers are ideal for small to medium-sized workgroups. To store its system files and faxes, FaxPress uses network storage such as a file server or workstation. FaxPress can be installed with any Microsoft Windows, Novell NetWare or Linux server and allows administrators to synchronize the FaxPress and network user database through Microsoft Active Directory Server Interfaces (ADSI), Novell Bindery and NDS. For Novell users, FaxPress provides a Single Sign On (SSO) capability that eliminates the need for users to juggle multiple passwords.

FaxPress Premier and FaxPress Enterprise

Built on existing FaxPress features, FaxPress Premier and FaxPress Enterprise represent an advanced, state-of-the-art approach to network faxing for the enterprise market. Its patent-pending technology offers a number of enhanced features, including integrated file storage for system and fax data files, a multitasking embedded Windows Operating System and pre-installed FaxPress Plus server software. FaxPress Premier and FaxPress Enterprise provide a very powerful and flexible software development kit allowing users to develop custom applications and production fax applications, and achieve the highest level of ROI.

If You Can Print It, You Can Fax It

Faxing from any application is as easy as printing when you use the Castelle FaxPress print driver. Attach documents in their native format to your fax and FaxPress will automatically convert them to fax format. The Fax Accumulate function acts like a virtual envelope, allowing users to easily send documents from various applications as one single fax message.

Integrate with Company Databases

The FaxPress software interface includes ODBC phonebook support, which allows users to easily access any ODBC data source as a FaxPress phonebook. Such databases include Microsoft Structured Query Language (SQL), Microsoft Access, Excel, and dBase among others.

Castelle Internet Faxing

Castelle Internet Faxing (CIF) allows fax transmissions between two or more FaxPress, FaxPress Premier or FaxPress Enterprise units on a network or through an intranet, extranet or internet connection. Fax messages travel over the IP network to a remote FaxPress user or to a final destination number.

FaxPress Premier/Enterprise Benefits

Intel Dialogic Fax Boards and Multiple Intel Processors Provides fast and reliable fax transmissions, worldwide compatibility and scalability

Analog and Digital Environments FaxPress Premier provides up to 16 fax lines across four integrated 33.6 fax modems; FaxPress Enterprise provides up to 72 fax channels across three T-1 lines

Microsoft Windows Embedded Operating System Multi-tasking and highly flexible server class

Embedded Email Gateways Send and receive faxes directly from the email client; no additional PC required

Integrated File Storage Internal hard disk stores system and fax job files

Microsoft Office Integration Send faxes directly from within Microsoft Office using the 'Send To' menu

Secure Web Browser Interface Use an internet browser to perform Faxmain functions remotely

Automated, Production Faxing Supports easy deployment of automated, production faxing in almost any environment

Microsoft Active Directory Integration Manage Active Directory users and FaxPress Premier users from a central location

Fax Reporting Generate a variety of standard or customized reports for system and individual users

Load Sharing Efficient distribution of inbound and outbound faxes across all available channels allows multiple FaxPress Premier servers to be used concurrently

Embedded Fax Archive Database and archiving service that eliminates the need to keep copies of faxed documents

Efficient Document Delivery Fax forwarding, internal document routing and carbon copy capabilities

A Complete Fax Solution

Simple Fax Management

Castelle's client software, FaxmainTM, displays the status of fax transmissions through color coding and flagged messages. SNMP support allows administrators to remotely monitor and reconfigure FaxPress units; with FaxPress Premier and FaxPress Enterprise administrators can perform all administrative tasks through the Secure Web Browser Interface.

Fax-to-Email Integration

Serving as a link between FaxPress and the network email system, the email gateways included in the FaxPress software package allow fax messages to be sent and received directly from a number of mail clients -- Microsoft Outlook, Lotus Notes, Novell GroupWise, and most SMTP-compliant mail systems. As a result, your company has the benefit of centralized fax and email management, while users have the convenience of a unified messaging environment.

Microsoft Exchange and Outlook

FaxPress provides two options for integration with Microsoft Exchange and Outlook. Castelle's Outlook Direct provides a direct link between the Outlook client and FaxPress, eliminating the need for an Exchange Server to send and receive faxes.

The FaxPress Exchange Connector interfaces FaxPress to the Exchange Server, allowing access to the Exchange global address book and administrative tools.

Integration with Lotus Notes

The native, VIM-based gateway for Lotus Notes provides email integration and also allows for simple capture of Lotus Notes user information into existing phone books.

Novell GroupWise and Other SMTP Compatible Email Systems

FaxPress offers a Simple Messaging Transport Protocol (SMTP) gateway that supports any SMTP compatible email system, including GroupWise. The SMTP gateway also supports intelligent load balancing when multiple FaxPress units are used for inbound or outbound faxing.

Software Developers Kit

FaxPress provides an easy-to-use Software Developer Kit (SDK) for developers who want to incorporate fax capabilities into custom applications such as production faxing, broadcasting and e-commerce. The FaxPress Premier/Enterprise Web Services SDK provides the tools for developing customized fax applications, including production faxing, that are fully interoperable in .Net and Java environments.

Production Faxing

Castelle fax servers support easy deployment of production faxing through the Drop Directory, allowing faxes to be sent without user intervention. The FaxPress DropFax utility creates an easily accessible directory for inbound faxes, allowing third party applications to retrieve the faxes stored there.

Scan-to-Fax

Castelle fax servers offer a complete scan-to-fax solution by integrating with popular scanners and multi-function printers, such as Hewlett Packard, Canon, Ricoh, Minolta, Konica, and Xerox.

Document Management

Castelle partners with the following companies to offer a complete document management and imaging solution: Hewlett Packard, Cardiff, Laserfiche, Westbrook, Liberty IMS, Ricoh, Legato/OTG, and PlanetPress.

Integration with PBX Systems

Castelle fax servers integrate with popular PBX systems including 3COM, Cisco, NEC, and Toshiba. For a complete list of compatible PBX systems, please visit our web site.

Fax Directly from GoldMine

Castelle fax servers integrate with GoldMine to allow users to send faxes directly from their contact management software.

Faxing from Accounting and Forms-based Applications

By integrating with FabSoft's Reform software, fax messages can be sent from popular accounting, financial and payroll systems.
