

# VTEL IPanel

The **VTEL IPanel** seamlessly blends advanced **HDTV viewing**, **PC applications**, **Internet applications**, **Zoom video conferencing**, and optional **H.323**.

This all-in-one applications platform is everything you need for your conference room or classroom. It is like a *Swiss Army Knife* – many useful capabilities integrated into **one platform** and displayed on large HD screens.

The VTEL IPanel is a **high performance videoconferencing system**. Features include:

- ✓ Professional **Pan-Tilt-Zoom (PTZ) camera** so you can pant/tilt/zoom to capture the entire room or a specific individual, white board illustration or an object.
- ✓ **Optional H.323 videoconferencing** software so you can videoconference with customers and colleagues around the world.
- ✓ **Zoom videoconferencing platform** so you can host scheduled or instant video meetings with up to 25 room, desktop, or mobile devices. Zoom features web meeting and video conferencing features, including screen sharing.

Even when you're not in a video conference, you will use the IPanel in **every meeting** to...

- Display spreadsheets
- Present PowerPoint slides
- Play DVDs
- Access websites
- Watch television

Plug your flash drive into any of the 4 USB data ports to view pictures, documents and presentations.

Participants can clearly see everything on the large HD screens.

*What can you do with traditional videoconferencing systems other than videoconference?* Nothing!

The IPanel is ready to use out of the box and includes the following components:

- Two HDTVs (42", 47", 50", 55" or 60")
- Professional mobile stand (optional)
- Professional PTZ camera
- Intel Core i-Series CPU
- DVD drive
- H.323 videoconferencing (optional)
- User-friendly on-screen interface
